

Public Information Meeting

Milwaukee Street Reconstruction Project

Date: February 7, 2012
Time: 5:00 pm
Location: Community Room – 312 W. Whitewater Street

Purpose: This public meeting is to discuss how the typical street section in the commercial district and the pavement markings of Milwaukee Street should be designed. City Council will make a final decision at the February 21 Council meeting.

Background: City is reconstructing E. Milwaukee Street from Wisconsin St to Esterly St in 2012 starting approximately in April. City Council has already decided the typical street section width and pavement markings for the residential section of Milwaukee St (Wisconsin to Dann). The Council also decided that the street width in the commercial district of Milwaukee Street (Dann to Esterly) will be 49 feet back of curb to back of curb (same as existing street width). The Council still needs to decide what the typical street section design should be with the pavement markings.

Considerations: Parking is the main item to be decided. Should there be no parking, parking on one side, or parking on both sides of Milwaukee Street? On street bike lanes will be part of the typical section design. Three typical street section designs with the pavement markings are enclosed.

Additional Information: City staff is working with the DOT to get Milwaukee Street from Newcomb east to Sunrise Lane reconstructed the same year as the Newcomb/Milwaukee intersection is reconstructed, possibly in 2017. City staff is recommending that the commercial section of Milwaukee Street from Dann Street east to at least the roundabout have the same typical section and pavement markings.

Agenda:

5:00 - Room is open to look at exhibits

5:15 - Presentation by staff

5:30 - Public comment
